Chorus 8X

**Harder...** 63

Take a solo on this song using the “C Major Scale”  
(all the white notes!)

When you are on the F chord try beginning  
your ideas on F or the notes of the chord,  
and the same for G!

**POWER TIP:** Starting a major scale on a different  
note is called playing a “mode”, in this case the  
“F Lydian” and “G Mixolydian” modes are  
just C scales starting on the F or G!
